

LINKEDUP PROJECT

Linking Web Data for Education

Open Knowledge Foundation

LinkedUp project has the following objectives:

1 →

Use cases for open data educational applications

Evaluation Framework for open data applications ←

2 ←

3 ↓

linkedup-challenge.org

VENI, VIDI, VICI

Total prize money: €39,500

Three developer competitions sponsored by the LinkedUp Project

Open to anyone and runs in three rounds:

- Veni competition (March 2013 - October 2013): Innovative prototypes and tools for analysing and integrating open educational Web data
- Vidi competition (November 2013 - April 2014): Challenging and innovative, mature data-driven applications
- Vici competition (May 2014 - November 2014): Robust applications for large-scale educational usecases, offered and provided by LinkedUp

Enter the Veni competition!

We're inviting you to design and build innovative and robust prototypes and demos for tools that analyse and/or integrate open web data for educational purposes, and have compiled a catalogue of data sets to get you started.

Deadline: 27 June 2013 ↗

data.linkededucation.org

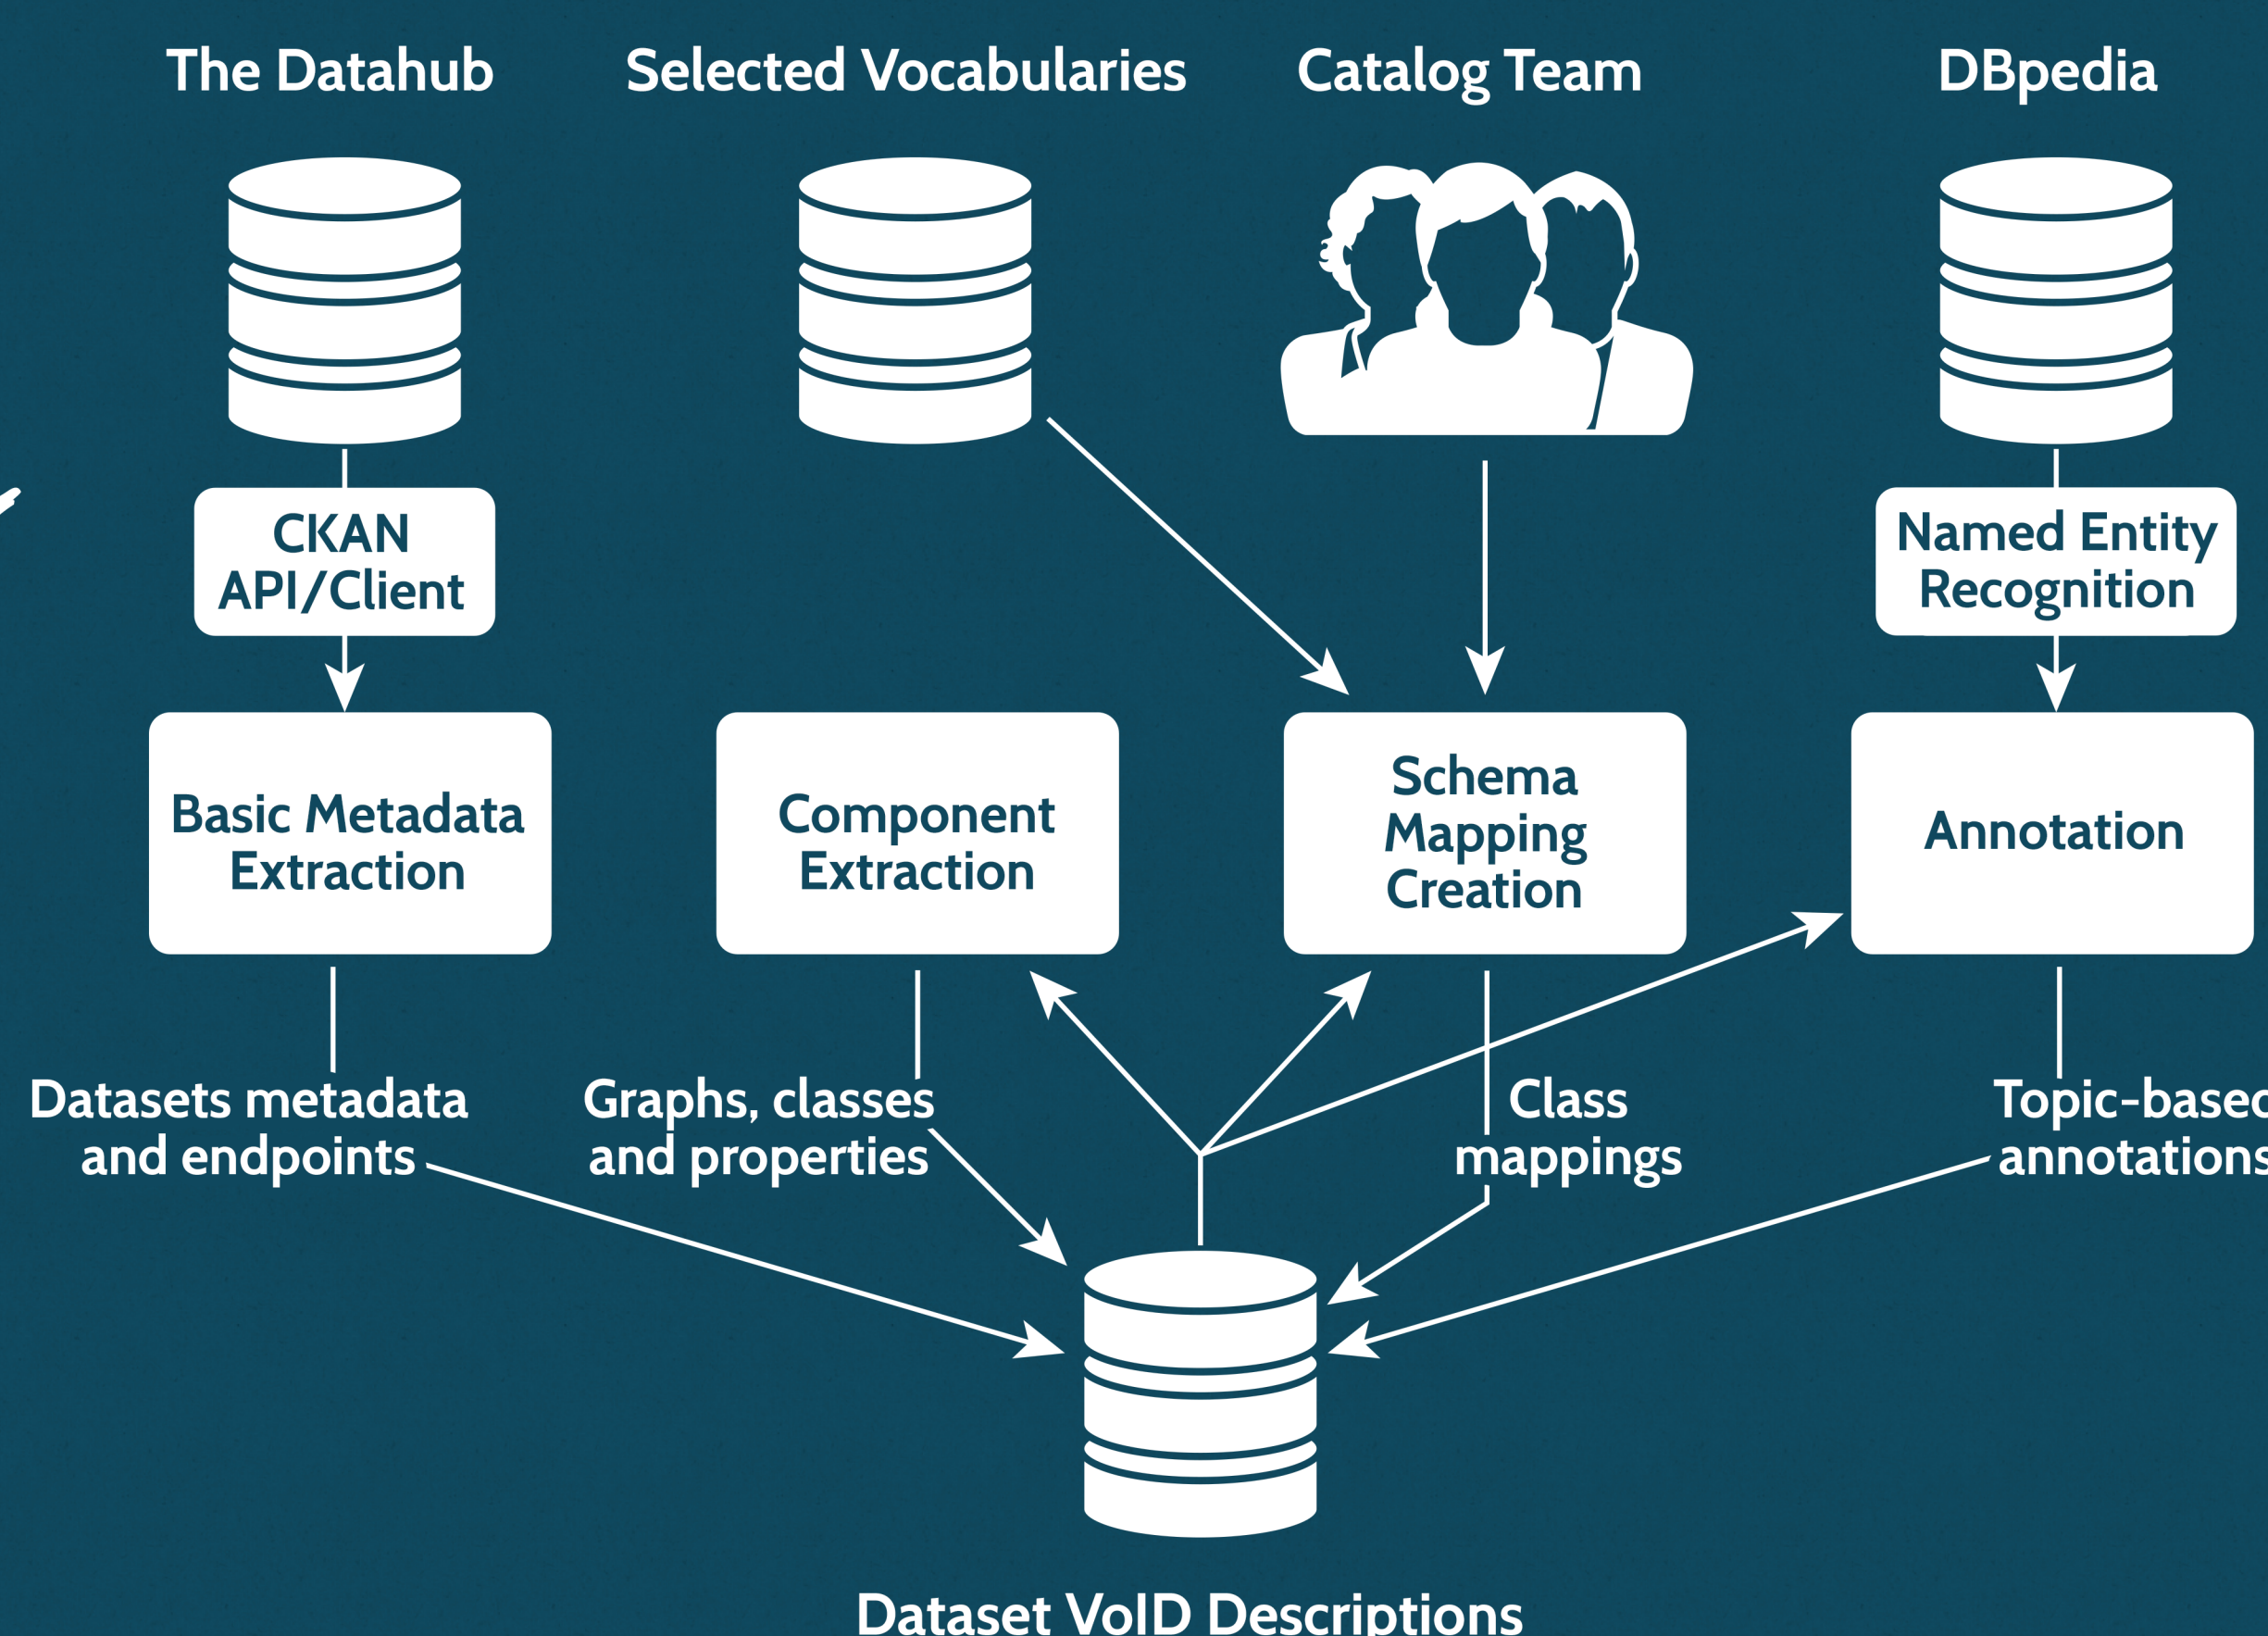

4 ↓

Automatic generation of structured descriptions and cataloguing of Linked Data educational datasets

Synergies are in particular envisaged with

APPS FOR EUROPE
For support and connections regarding the LinkedUp Challenge

Planet Data
To link with community of publishers of linked data

- Metadata extraction
- Dataset component extraction (graphs, vocabularies, resources, etc.)
- Schema mapping and alignment
- Dataset resource annotation with structured knowledge
- Representative and normalized score of topics covered by datasets
- Semi-automated validation & filtering of annotations
- VoID of Linked-Education datasets, with rich and structured knowledge (entities, topics)
